## Office Action Summary

Patrick J. Nolan

The N	NAILING DATE of this communication appears on the c	over sheet with	the correspondence address		
Period for Reply					
THE MAILING - Extensions of time	D STATUTORY PERIOD FOR REPLY IS SET TO EXF DATE OF THIS COMMUNICATION. may be available under the provisions of 37 CFR 1.136 (a). In no event, h		_		
<ul> <li>If NO period for rep</li> <li>Failure to reply with</li> <li>Any reply received</li> </ul>	communication. bly specified above is less than thirty (30) days, a reply within the statutory bly is specified above, the maximum statutory period will apply and will exp hin the set or extended period for reply will, by statute, cause the application by the Office later than three months after the mailing date of this communication. See 37 CFR 1.704(b).	ire SIX (6) MONTHS fr on to become ABANDO	om the mailing date of this communication. NED (35 U.S.C. § 133).		
Status					
1) 💢 Respons	sive to communication(s) filed on Apr 22, 2002		·		
2a) This act	tion is <b>FINAL</b> . 2b) 💢 This action is no	on-final.			
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11; 453 O.G. 213.				
Disposition of C	laims				
4) 💢 Claim(s)	65-71		is/are pending in the application.		
4a) Of the	e above, claim(s)		is/are withdrawn from consideration.		
5) Claim(s)			is/are allowed.		
6) 💢 Claim(s)	65-71	<u> </u>	is/are rejected.		
7) Claim(s)		10.00	is/are objected to.		
8) Claims		are subject	to restriction and/or election requirement.		
Application Paper	ers				
9) The spe	cification is objected to by the Examiner.				
10)□ The dra	wing(s) filed on is/are a) \[ \sigma  \equiv  \]	ccepted or b)	$\Box$ objected to by the Examiner.		
Applica	ant may not request that any objection to the drawing(s	s) be held in abey	vance. See 37 CFR 1.85(a).		
11)☐ The pro	posed drawing correction filed on	is: a)□ a	pproved b) $\square$ disapproved by the Examiner		
If appro	oved, corrected drawings are required in reply to this O	ffice action.			
12) The oat	h or declaration is objected to by the Examiner.				
Priority under 3	5 U.S.C. §§ 119 and 120				
13) Acknow	vledgement is made of a claim for foreign priority u	nder 35 U.S.C.	§ 119(a)-(d) or (f).		
a) 🗌 All b)	□ Some* c)□ None of:				
1. 🗌 Ce	ertified copies of the priority documents have been	received.			
2. □ Ce	ertified copies of the priority documents have been	received in App	lication No		
	opies of the certified copies of the priority documen application from the International Bureau (PCT	Rule 17.2(a)).	<del>-</del>		
<b>,</b>	tached detailed Office action for a list of the certification	ed copies not re	eceived.		
	vledgement is made of a claim for domestic priority				
	ranslation of the foreign language provisional application				
	vledgement is made of a claim for domestic priority	under 35 U.S.(	J. 99 120 and/or 121.		
Attachment(s)  1) Notice of Refer	rences Cited (PTO-892) 4) Int	erview Summary (PTO	9-413) Paper No(s)		
.,					

2) Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) Information Disclosure Statement(s) (PTO-1449) Paper No(s).

6) Other:

5) Notice of Informal Patent Application (PTO-152)

Serial Number: 09/031,629

Art Unit: 1644

## Part III DETAILED ACTION

1. Claims 65-71 are pending.

2. The request filed on 4-22-02 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/031,629 is acceptable and a CPA has been established. An action on the CPA follows.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 65-71 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for detecting IDDM by detecting a reduction in the proteolytic processing of NfkB by proteosomes, does not reasonably provide enablement for detecting any autoimmune disease by detecting a reduction in the proteolytic processing of NfkB by proteosomes. The specification does not enable any person skilled in the art to which it pertains, or with which it is most clearly connected, to use the invention commensurate in scope with these claims.

specification discloses only one working demonstrating the ability of detecting a reduction proteolytic processing of NfkB by proteosomes and correlating said reduction with an autoimmune disease. The state of the art, The Merck Manual of Diagnosis and Therapy, does not recognize the use of detecting a reduction in the proteolytic processing of NfkB by proteosomes for detecting all of the myriad amount of autoimmune diseases. In addition the Merck Manual teaches there are five independent possible mechanisms for developing an immune response to autoantigens. Lahita et al., specifically teaches that even within the NOD mouse that IDDM disease is not a certainty, in fact the range of disease frequency is 20-80%, and depends upon environmental factors since all NOD mice represent the same inbred strain. Applicant's specification discloses that the NOD mouse is predictive of all autoimmune disease because the same defect in NOD mice occurs in all autoimmune diseases. However, even within IDDM there are at least 14 genetic loci that have been linked to the development of the disease. For Applicant to state that a single unifying molecular event is common to all forms of autoimmune diseases is not supported by the state of the art, especially in light of the fact that not all genetically predisposed NOD mice get

Serial Number: 09/031,629

Art Unit: 1644

IDDM. The state of the art clearly recognizes that genetic malformations alone are not sufficient for consisting developing an autoimmune disease, specifically, IDDM, as represented by the NOD mouse. Since the breadth of Applicant's claims reads upon at least 60 recognized autoimmune disorders and their is no specific guidance or working examples to enable one of skill in the art to reasonably predict that detecting a reduction in the proteolytic processing of NfkB by proteosomes would correlate to a wide range of autoimmune disorders and the state of art as taught by The Merck Manual does not recognize the use of said detection method, it would be unpredictable and require an undue amount of experimentation to practice the full scope of Applicant's claimed invention.

- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Nolan whose telephone number is (703) 305-1987. The examiner can normally be reached on Monday through Friday from 8:30 am to 4:30 pm.
- 5. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Christina Chan, can be reached at (703) 305-3973. The FAX number for our group, 1644, is (703) 305-7939. Any inquiry of a general nature relating to the status of this application or proceeding should be directed to the Group receptionist, whose telephone number is (703) 308-0196.
